1. **Inaugural** The meeting was started at 12:10 PM, on 19/12/2025 in the Examination Hall, First Floor of Mahayogi Guru Gorakhnath Ayush University, Bathat, Gorakhpur. The meeting was presided by President AIMLTA, Mr. M. M. Dass who welcomed all attendees and initiated the meeting.
2. Confirmation of last CEC Meeting at Nice Hotel, Korol Bagh, New Delhi on the eve of 43rd AIC& SS on 20th October, 2024.

General Secretary Report, Discussion & Member Opinion

Presented during Central Executives and State Secretaries, AIMLTA meet at Examination Hall, First Floor, Mahayogi Guru Gorakhnath Ayush University Pipri, Bhathat, Gorakhpur, Uttar Pradesh-273306 and Auditorium, 44th All India Conference & Scientific Seminar, Gorakhpur-273007 Uttar Pradesh, India.

GENERAL SECRETARY, AIMLTA REPORT

Conference Venue : **Auditorium, Mahayogi Gorakhnath University Gorakhpur (MGUG)**
Balalpar Road, Sonbarsha,Gorakhpur-273007, U.P.

Respected President, AIMLTA, Vice President, AIMLTA Div. A and B, Treasurer, Internal Auditor, Zonal Secretaries, Central Election Officer, Editor, AIMLTA Chronicle, Chairman, F.C.C., Chairman and Controller of Exam. Academic Board, AIMLTA, All Central Executive Committee Members, All State Secretaries, Organizing Chairman, Secretaries and all sub Committee Members, and Special Invites, AIMLTA and respected members from all parts of the country.

Myself, Devendra Prasad, General Secretary, All India Medical Laboratory Technologists' Association (AIMLTA) extend most cordial welcome to all my respected seniors and friends. I feel privileged to express my thanks to all for helping me during my tenure. Now enjoy the 44th AIC & SS and chose new healthy central committee for the best interest of association. I am indebted to all Central Body, State Body and General Body Members and extend my heartfelt gratitude to all the members of the association. You all have bestowed upon me this great honor and uploaded Himalayan responsibilities on my shoulder to work for the welfare of the Association. I do hope, that good will, co-operation, co-ordination, blessings, love, affinity confidence expressed for me will always be in my mind. I had given my best to prove worthy of your choice. Your right guidelines, right directions, new ideas, to enable myself to execute my duties neglecting false pride and prejudices and political recrimination.

Respected Members, as I know and also well known to you, that some members of our esteem association have became self-made pseudo legislators, started restive behavior, haul up doubts in many others minds about the stability of our united democratic association.

They are creating faction, political rivalries either for their self-interest, or narrow and regional interest. They have adopted the method of blackmailing by which they have disrupt many a state and spoiled the unity and integrity. As a result members are in confusion. There is shortcoming of developing unity as well as facing divisions.

In the association we should put our heart and mind, wisdom and knowledge which is bound to be a uniting factor with experienced and upcoming generation. We have to understand one another and work together for the welfare of AIMLTA. We have no right to bring down the reputation of this esteem Association. All questions require to be decided on principles of tolerance, justice and equity, by healthy discussion, adjustment of views and acceptance of consensus. Despite the apparent lowering of standards and increase of lawlessness and indiscipline, my faith in our members is unshaken.

With the submission, I extend my heartiest gratitude to our reverent Sarva-Shree AIMLTA Mr. A. N. Sinha, who is a man of mark and a model administrator of our association. I have received guidelines, good will and much more affection from him all these days. I am very much thankful to him. I also offer my congratulations and good wishes to the newly elected and re-elected State Officials, members and also my best thoughts to those no longer with us.

It is a matter of great pride and privilege for the All India Medical Laboratory Technologists Association to hold and celebrate its 44th All India Conference, Scientific Seminar and Workshop, AIMLTA at MGUG, Gorakhpur with the active support team of Mr. Udai Saroj Singh, Mr. Ranjit Kumar Gupta and all organizing committee Members.

It is my proud privilege to present before you the General Secretary Report of AIMLTA, highlighting detailed activity of the association with specific demand before the Govt. of India for implementation of modified NCAHP-Act also with specific demand i.e. “RIGHT TO PRACTICE THE PROFESSION”.

Before discussing programme and policy of the association I would like to apprise you about the functioning of the association (AIMLTA) and its objective. Due to advancement of Medical Laboratory Technology in India and abroad and globalization of Medical Technology the Association enters into International arena and affiliated to International Association of Medical Laboratory Technologist (IAMLT), Thun, Switzerland subsequently to IFBLS, Canada (International Federation of Bio-Medical Laboratory Sciences) and had become the active member of Asian Association of Medical Laboratory Scientists (AAMLS), Japan. The association is also N.G.O. members of World Health Organization (WHO) and making all round efforts to streamline the Medical Laboratory Technology and its quality control for better Primary Health Care system in the country.

I would like to emphasize here that many states and their adjoining cities are till date unexplored and uncovered by the objectives of our association. Therefore, those uncovered areas have to be covered and built up by providing the awareness of the ethics and activities of our association by virtue of moral knowledge, not by political provisions and privileges. We have to undertake the responsibility and conductorship with valour and steadfast perseverance to the end to get the ultimate desired result regardless of a puzzling question or enigma. On account of it the State Secretaries and Zonal Secretaries in their respective states shall have to induct members of their adjoining cities thereby make a companion for achieving the long pending goal bit by bit in succession. The Central Committee has been actively working in Uttarakhand and Jammu and Kashmir, with a recent milestone being the completion of their membership drive in Uttarakhand. This development indicates the committee's focus on strengthening its presence in these regions.

"Hereafter, in light of this issue, the undersigned will formulate instructions and establish a sub-committee to facilitate the resolution of the aforementioned purpose. Furthermore, defunct and distressed states will be

considered and revitalized by the administration. Majority of states have completed their elections by March 2025. All proceedings related to this matter, was under the supervision of General Secretary and the directives have been binding on State Office bearers."

Now AIMLTA is a professional association and an “Apex Body” of Medical Lab. Technologists of India which is working hard in the best interest of Medical Lab. Technology and technologists of India. This association undertake various social welfare health programme to serve the poor section of society by and large and coordinate with National and International agencies which are working in Lab. Medicine field with its objective “Health for all” and to support all the Welfare Health Development Programme sponsored by Govt. of India and respective state govt.

Association Network: Association Network wing is spread up right from Kashmir to Kanya Kumari and state units have been established in all most all states of the country and further on to constitute new state units in uncovered area as Andaman Nicobar, Nagaland, Uttarakhand and Himachal Pradesh. Some state units like Assam, Tripura and West Bengal have not been reconstituted in 2025. "States where the new State Committee has been constituted should intensify their activities, and states where elections have not taken place will be considered as defunct unit.

According to recent data available with the association the total strength of Medical Lab. Technologists in India is about 6.50 lacs (Six lakh fifty thousand) working in Govt., Semi Govt., Public and Corporate Private Sectors and association is persuading them to join this professional association for their bright future and right placement in medical profession. "Considering the significant increase in patient numbers in all medical establishments over the past 10-15 years, there is an urgent need for the government to reassess and create posts proportionate to the workload in these institutions. This is crucial as the existing workforce is struggling to cope, resulting in revenue losses and compromising the quality of reports provided to patients."

The All India Medical Laboratory Technologists' Association (AIMLTA) has 35,000 registered life members, excluding student members. Recently, we've seen significant interest from NRI medical lab technologists. Many NRIs and professionals working abroad, from countries like UAE, KSA, Qatar, Nepal, UK, USA, Sri Lanka, Bangladesh, Canada, and Bhutan, are registering online.

AIMLTA has submitted a National Policy Draft (NPD) to the Union Ministry of Health and Family Welfare, Government of India, and various state health ministries. The draft proposes uniform standards for recruitment, promotion, pay structure, job description, allowances, training, and refresher courses. It also advocates for opening MLT training institutions nationwide and addresses social and technical concerns.

Council for Med. Lab. Technologists: Our central office bearers have been keeping the demand for a separate Council (Medical Laboratory Technologist Council) through correspondence and presentation before the Honourable Ministers, Secretary and Director level officials of the Health and Family Welfare Department.

Association representatives/delegates met to the Secretary Health, Additional Secretary, Joint Secretary, Director and office bearers referring Allied Health Care Professional Commission several times in Central Secretariat, Nirman Bhavan, New Delhi, NCAHP office, Munirka, New Delhi and has presented the matter of the association.

As a result of the visionary vision of Honourable Prime Minister Shri Modi ji, after going through various processes, in 2021 the National Level Regulatory body came into existence of which modifications is underway, that we know as NATIONAL COMMISSION FOR ALLIED AND HEALTH CARE PROFESSIONALS (NCAHP Act, 2021).

Our association members have engaged in fruitful discussions with several esteemed government officials to advocate for the rights and duties of laboratory technologists across India. We had the honor of meeting with Hon'ble Ministers Mr. J.P. Nadda, Minister of Health and Family Welfare, and Smt. Anupriya Patel, Minister of State from 2022 to 2025.

During these meetings, we submitted several letters highlighting the vital role of the Allied Health Care Professional Council in protecting the interests of laboratory professionals across the nation, emphasizing its significance in ensuring quality healthcare.

"State Level Allied Health Care Council" is going to be formed soon in many states. Work has been completed in several states, and is underway in the remaining states. The office bearers of the association are required to pay closer attention to this matter. We must perform our duties unitedly, prioritizing the organization's and cadre's interests, and remain vigilant. Everything will be fine.

Academic Activities of the Association: AIMLTA is dedicated to and committed for the development of the MLT training programme in the country and it has introduced various MLT training programme to produce skilled and technically qualified personnel in the field of Med. Lab. Technology to cope the growing demand of trained Medical Laboratory Technologist in the fast-growing health care system and national health programme of the country. Academic Board, AIMLTA is playing a key role in training programme and has introduced one year, two years DMLT courses and PG-DMLT for student members and in-service members through its recognized affiliated MLT training institutions in different states of the country and every year approx. 2500 (two thousand five hundred) MLT trained personnel are passing out successfully to manage pathology labs. in govt. and non-govt. organization. Apart from these short terms refresher course and CEP programme for the members of the association have also been introduced under Academic Board, AIMLTA. This training programme is very fruitful for medical lab. professionals. Furtherance, its up to the NCAPH-Act, its curriculum which had been framed of MLT's professional training.

We have to demand from the State Governments to arrange Internship for those students who are getting training from Academic Board, AIMLTA recognized institutions so that they develop their skills.

Shortly, examiners are requested to attend online classes periodically to enhance the skill development of students from institutes affiliated with the Academic Board. Upon successful implementation, negotiations can be initiated with all the state governments to extend this initiative to students studying in government colleges.

International Conference: The membership fee of IFBLS has been deposited. Our duty is to visit IFBLS website regularly to get information about international conference wherever organized and try to participate in the conference.

AIMLTA, ALL INDIA CONFERENCE & SCIENTIFIC SEMINAR: 45th A.I.C. & S.S. along with G.B. Meeting of AIMLTA will be convened in the year 2026 most probably in the month of November to December 2026 by that time the NCAHP Act & Council demand would be fulfilled by the Union Health Ministry, Govt. of India with notification. AIMLTA State Units interested and desirous to hold 45th A.I.C. & S.S. in their respective state may offer with budget provision.

Publication of Chronicle: Chronicle (Regd. No. BIHENG/2006/17161, ISSN 2349-1302, SS Post No. PT-69/2014) is the most important and prestigious journal of the AIMLTA. Association has taken up the publication of Qr. Chronicle along with Annual issue at the time of All India Conference and Scientific Seminar every year. Editor and Editorial Board AIMLTA is working hard to ensure timely and Quality publication of Scientific Journal. Moreover, Mr. Akhileshwar Prasad, Editor will apprise you about Chronicle publication and progress there on.

Website: AIMLTA website www.aimlta.org.in with Internet Broad brand facilities has been opened for fast communication through electronic media. All information and activities of Association and Academic Board, AIMLTA are being displayed on website www.aimlta.org.in and also International information of IFBLS, AAMLS and website has been updated after removing all technical problems.

Head Office: Head Office is fully prepared to support and facilitate all initiatives and movements related to AIMLTA.

Registered Office: For any queries related to the Registered Office, you can reach out to:

Contact Persons:

-Mr. Ashok Kumar Kem: Office In-charge cum Vice President, State Unit Delhi

-Mr. M.N. Yadav: State Secretary, State Unit Delhi

NRI: This facility had improved the popularity of AIMLTA in India as well as outside India, and many NRI Medical Laboratory Technologists or those working outside India are approaching us for membership of AIMLTA. Association is taking proper care and action in to the matter. Now, one can experience the AIMLTA website and can feel proud of its performance.

The 44th ALL INDIA CONFERENCE AND SCIENTIFIC SEMINAR will indeed be a mega event for the medical Laboratory Technology and Technologists of India. Scientific Seminar and workshop will be through provoking and fruitful and will hopefully open new chapter to serve the health care system and National health Programme of the Country. Now, let me assure that this conference will provide excellent opportunity to the participants to build professional solidarity a step forward for better tomorrow.

CEC Agenda :

- After getting approval from CEC, 43rd AIC and GB two meetings of Constitution Amendment Committee have been conducted, its Final Draft will be placed in CEC and 44thAIC GB.
- The restructure fee of NRI, LMC and Students membership form & fee which had been approved in 43rd AIC & CEC has already been implemented form 16th January, 2025 (NRI ₹25,000/- LMC ₹1500/- Students membership₹ 500/-) it is also displayed on association's website.
- GST + NRI Funding which had already been approved in last CEC & 43rd AIC could not be implemented by central committee and it is pending due to some unavoidable circumstances.
- States which accepted to organize proposed 44th AIC & SS didn't took any initiative. During online CEC meeting, on the peak at the eleventh hour, UP State Secretary after taking a weak time, initiated the proceedings of 44th AIC & SS. Association offers thanks to UP State Secretary cum 44th AIC Org. Secretary Mr. Udai Saroj Singh & Org. Chairman Mr. Ranjit Kumar Gupta for their endeavorship.
- It was decided in CEC, 43rd AIC, that election should be conducted in every states by 31st March 2025. As per constitution of AIMLTA election has been completed in every state excluding Assam, Tripura and West Bengal.
- Anti association activity: Mr. S. Puglenthi, Ex State Secretary, Tamil Nadu had been noticed & charged of Anti -Association activity. A committee had been formed and further action will be done on the basis of committee's report.
- Pending Works: Nagar Nigam Tax of Office Building, Pending's of 43rd AIC payments

State Activities : on 14 April 2025, Jharkhand state celebrated IFBLS day, on 30 June, 2025 State Conference was organized in Bihar, On 30 November, 2025 State conference was organized in Odisha. All the conferences were grand success .

NCAHP : On 07/08/2025 Public domain suggestions were called by NCAHP, on which suggestion were called off by taking initiative by central committee on App. As a result in Clinical/ Diagnostic Laboratories the step have been increased from 4 to 5 progression, and in Academia progression have been increased from 3 to 7 progression and including senior Professor & Principal it has been shifted up to 9 progression. By the associations initiative a new opportunity is generated for lab technologists in Research & Development. Thank NCAHP for considering Scientists slab to HOD & Director.

The previous CEC meeting has paved the way for the establishment of a Scientific Board, thereby strengthening the scientific temperament in the country. We again invite bonafide members to submit their applications for the positions of Chairman, Co-Chairman, and members of the Scientific Board by the end of this month. To facilitate the formation of the Scientific Board, interested individuals are requested to visit our website and submit their applications online with the required documents, or send their applications via registered Indian post.

"An earnest appeal to all officials":

It is requested to allocate merely 24 minutes from 24 hours, dedicating to the association with unwavering honesty and commitment. But sorry to say within three years, only few state have shown their interest in that appeal, for association's development one have to give mere time. We kindly request that you spare atleast 24 minutes from your daily schedule for the association.

At last, I express my sincere thanks to all participants who have come from different parts of the country to participate and to contribute in the All India Conference. I am also thankful to those who have contributed their best specially the members of Uttar Pradesh State Unit AIMLTA including Mr. Udai Saroj Singh, Mr. Ranjit Kumar Gupta and team in MGUG, Gorakhpur, Deoria which has organized such a successful conference.

I am also thankful to the Prof. Surinder Singh, Vice-chancellor, MGUG and Heads of different Institutions. Special thanks to Prof. Vibha Dutta, Director & CEO, AIIMS, Gorakhpur, Prof. K Rama Chandra Reddy, Vice-chancellor MGGAU Gorakhpur, Principal, BRD Medical College, Prof Hari Shankar Joshi, Director, ICMR-RMRC, Mr. Rohit Kumar Srivastava, Principal, Allied, MGUG who allotted the auditorium, for their cooperation and support to the Association.

I would like to express my sincere appreciation to the Electronic, Print, and Social Media Exhibitors Companies, AB affiliated institutions, including esteemed international speakers. I wish all of you peace, love, knowledge and learning.

Particular recognition is due to:

The Event Management team for their outstanding direction Exhibition and Conference Services for their invaluable support, the Auditorium Management staff for their dedication. All other individuals who played a crucial role in the event's accomplishment.

I wish all of you for peace, love, knowledge and learning.

Thank you all.

(Devendra Prasad)

General Secretary, AIMLTA

The General Secretary presented his report to the house, highlighting several key points.

1. **Support for AIMLTA Chronicle:** He urged all states to support the editor of AIMLTA Chronicle by providing quality papers.
2. **Office Renovation:** The Patna office has been renovated.
3. **Data Update:** All AIMLTA data has been updated in the system.
4. **AIMLTA Bhawan:** He proposed establishing an AIMLTA office, dubbed "AIMLTA Bhawan," in New Delhi, which received enthusiastic applause
5. **NRI Membership:** To emphasize NRI membership

The General Secretary of AIMLTA presented his detailed report in the house and distributed copies to all members present. He comprehensively briefed the house on the previous minutes, covering A to Z key points. After 15-minutes, the proceedings commenced in the house.

– Mr. Rocky Daniel expressed that in previous conference Workshop, more than 40 members were present in

the workshop of Microbiology & 60 in workshop of Biochemistry. Not only HOD of Microbiology as well as Biochemistry tremendous help and support was provided to convene that workshop. Staff were integral part of that workshop.

- Dr. B.N. Shukla suggested that first of all report, inaugural function description should be given.
- After completion of the report, the signatures of GS, President / Treasurer should be there of the concerned pages.
- After completion of each report, should be mentioned that who had given the vote of thanks.
- Mr. Shamsher Singh pointed out of the 5 years of tenure of Academic Board, suggesting that it contradicts the constitution.
- Dr. B.N. Shukla suggested various improvements in minutes before house.
- Mr. Shamsher Singh pointed out of the miscellaneous expenses in Academic Board of the huge amount at 2 places in report provided.
- Mr. R.D. Langde pointed out of the report regarding the Bihar CEC & Secretary in the report.
- Mr. Amol Patni raised point regarding any debaring letter that has been send to the persons in this regard.
- Mr. Devendra Prasad clarified the house about the question raised.
- Mr. S. Mukhopdhayay raised the point regarding WB elections & the state committee.
- Dr. B.N. Shukla raised point that U.P. state elections are also not constitutional.
- The GS, Mr. Devendra Prasad, replied that elections have been conducted in U.P. on 9th March. Observers have been sent on the request of the CEC and election officer. The state body has been elected constitutionally and they are working satisfactorily.
- Mr. Shamsher called to stopped the discussion and to meet after the lunch break.
- After the lunch break, the meeting continued.
- Mr. Rajesh Kumar Pandey, wanted to know about the status of association registration supported by Mr. Mulak Raj & Mr. Mahendra Nath
- The GS, replied that it is under process.
- Mr. Rocky Daniel, raised about the date of CEC & spelling in backdrop
- General Secretary read his report before the house.
- The President asked the members present in the house for questions.
- Mr. Rajesh Kumar Pandey raised questions, that whether the matter of Mr. Puglenthi & Mr. Bose is same.
- GS replied that proper proof are there and challenged to show it at suitable platform. the proper proof was discussed and decided to show it on a suitable platform.
- Mr. M.M. Dass, President, described details regarding the matter.
- Mr. R.D. Langde also added 2 questions regarding it.
- Mr. Rocky Daniel suggested that there should be 2 persons writing the minutes and at the end of the meeting both minutes would be matched.
- Last GS report passed with 2/3 majority, except the suspension of Mr. S. C. Bose, which has been restored on the intervention and recommendation of central election body and suggestion of some CEC members. Additionally, it was also decided that in future, such type of ban will be effective if any member is involved in anti association activity.
- Last minutes passed.
- At 5:40 PM, General Secretary, reminded to the house that lots of works of current AIC are pending, though

the scheduled timing of the C.E.C. meeting was between 11:00 AM to 2:00 PM, and in spite waiting for Treasurer, Mr. Amol R. Patni, meeting had started and he arrived late at 1:30 PM.

- President, Mr. Manmohan Dass-replied that the present conference and its preparations go to hell, but the present C.E.C. meeting will continue.
- G.S. replied that due to this type of rude behavior of top officials, we have suffered a lot in AIIMS, Delhi AIC, where also Mr. President reached late and some top officials not attended that AIC and lots of problem were created.
- Listening to the G.S. statement, the house in majority agreed to end the present C.E.C. meeting had to be postponed for the proper preparation of current AIC and meeting was adjourned.

CEC members and State Secretaries including members of Academic and special invitees participated and discussed in detailed on G.S. report.

The General Secretary's report was well-received by the house, with an overwhelming approval through a voice vote. The meeting was adjourned at 05.45 PM.

"LABTECHCON-2025"

Dated 20th to 21st December, 2025

All resolutions and proceeding of C.E.C. meeting will be widely circulated amongst AIMLTA members.

Outgoing President, AIMLTA

G.S., AIMLTA

LABTECHCON-2025

44th ALL INDIA CONFERENCE & SCIENTIFIC SEMINAR OF AIMLTA, GORAKHPUR (Uttar Pradesh)

Dated 20th to 21st December, 2025

Venue : **Auditorium, Mahayogi Gorakhnath University Gorakhpur (MGUG) Balalpar Road, Sonbarsha,Gorakhpur-273007, U.P.**

Breakfast : Started at 8:00 A.M. on 20th Dec., 2025

Scientific Session : Started at 12:10 P.M. on 20th Dec.,2025

Inaugural Function : Started at 11:00 A.M. on 20th Dec., 2025 (Day-1)

Uttar Pradesh State Chapter of AIMLTA organized 44th A.I.C. & S.S. in the premises of prestigous Mahayogi Gorakhnath University Gorakhpur (MGUG) Auditorium, Balapar Road, Gorakhpur (Uttar Pradesh) from 20th-21st Dec., 2025 in which more than 1200 delegates, co-delegates, members and observers from different parts of the country took part with full zeal and vigour to celebrate this mega event and to make it memorable by projecting the programme and policy of the AIMLTA which is the only "Apex Body" of Med. Lab. Technologists of India. The role of Medical Lab. Technologists in primary health care system is of great importance and a key factor for successful implementation of National Health Programme and Diagnostic Treatment of suffering people. In this national conference, the burning issue was "National Council for Allied Health Professionals, Act-2021" the major part of discussion in member session house. The Allied and Healthcare Professions Council has already formed, this is combined for 56 types of Healthcare Professionals but we requested the, Govt. of India, New Delhi to take necessary steps in NCAHP Act-2021 for Medical Lab. Technologists.

Through, this conference, we will demand to the Govt. of India as well as State Govt. to make necessary amendment in NCAHP-Act 2021 for Medical Lab. Technologists at earliest which will fulfill the new dimension in Health care system of the country. During two days deliberation Scientific Programme. Plenary lecturers, Symposia, Free Communication (Oral and Poster) Session, Workshop & Techno Quiz were arranged and Scientific activities of the association was highlighted by various scientific paper presentation and workshop to fulfill the objective "Health for All" by theme of the conference : **“Pioneering Healthcare Through Precision, Passion And Innovation”** in the country.

Chief Guests :

1. **Prof. Dr. Atul Bajpayee (Ex, Vice Chancellor, MGUG, Gorakhpur)**
2. **Dr. G.N. Singh, Ex Drug Controller of India & Advisor, Hon'ble, CM, Uttar Pradesh**
3. **Prof. Dr. Vibha Dutta, CEO & Director, AIIMS, Gorakhpur**
4. **Prof. Ram Kumar, Principal, BRD Medical College, Gorakhpur**
5. **Prof. Hari Shankar Joshi, Director, RMRC, Gorakhpur**
6. **Prof. K. Ramachandran Reddy, Vice Chancellor, Aayush University, Gorakhpur**
7. **Dr. Manglesh Srivastava, Mayor, Gorakhpur, Uttar Pradesh.**
8. **President and General Secretary, AIMLTA**

All the above distinguished guests jointly inaugurated the 44th All India Congress and Scientific Seminar on 20th Dec. 2025 at 11.30 P.M.

"The meeting commenced with the inauguration ceremony, where members lit the lamp, followed by the Saraswati Vandana." "The Chief Guest and guests of honor were felicitated with shawls, tera kota, mementos, and bouquets."

RELEASE OF CHRONICLE : AIMLTA prestigious Scientific Journal "Chronicle" colourful special issue 2025 was released jointly by all the dignitaries present on dais and was well appreciated by the quality of Journal covering many Scientific article, original research work, messages from various dignitaries and latest information of association progress.

Mr. Udai Saroj Singh, Organizing Secretary, 44th AIC & SS, was called upon the stage for inaugural address, to begin the official proceedings of this symposium with his unique approach.

He welcomed the guests, member delegates, observers, Press, Media, associate companies, T.V. Channels & Health authors who have come from different parts of the country and expressed his happiness for their participation.

Good morning to all, I bow to Baba Gorakhnath. Dr. G.N. Singh Sir, distinguished personality, Ex Drug Controller General of India & adviser to Honorable Chief Minister of Uttar Pradesh; Major General Dr. Atul Bajpayee Sir, former Vice Chancellor of Mahayogi Gorakhnath University, Gorakhpur, Special Guest Major General Dr. Vibha Dutta Madam, Director, and CEO, AIIMS, Gorakhpur, Dr. Ram Kumar Sir, Principal, BRD Medical College, Gorakhpur, Professor Ramchandra Reddy, Vice Chancellor, Ayush University, Gorakhpur Professor Harishankar Joshi Sir, Director, ICMRC Gorakhpur, Dr Manglesh Srivastava ji, Mayor, Gorakhpur, Shri Manmohan Dass ji, President, AIMLTA, Shri Devendra Prasad ji, General Secretary, AIMLTA respected delegates, scientists, doctors, researchers from pan India and medical laboratory professionals, dear students and my colleagues: warm greetings and a heartfelt welcome to all of you at this scientific conference of AIMLTA in Gorakhpur, Uttar Pradesh.

This conference is not just an academic event but a strong platform to give new direction to medical laboratory technology, science, quality standards, and research-oriented healthcare. In today's era, when challenges and coordination complexities are increasing, the role of medical laboratory technologies becomes even more significant. AIMLTA is continuously working in this direction.

Medical laboratory technologists are the backbone of the healthcare system. Their role in disease detection and management is extremely important. Without proper laboratory diagnosis, effective treatment is not possible.

There is a need to strengthen the educational and professional capabilities of lab professionals, promote research, innovation, and evidence-based practices, and develop a strong, independent system aligned with quality, ethics, and basic standards. Conferences like this serve as a powerful medium for knowledge exchange, in-depth analysis, dialogue, and guidance for future directions.

I am fully confident that the scientific discussions, research presentations, and deliberations during this event will bring positive changes in policy-making, academic reforms, and practical implementation in the future.

In conclusion, I extend heartfelt thanks to the organizing committee, all speakers, delegates, and supporting institutions for this excellent event, and convey my best wishes for the success of the conference.

Let us all together resolve to strengthen the nation and the healthcare system through knowledge, quality, and service, and contribute significantly towards a developed India by –2047.

Mr. Devendra Prasad, General Secretary, AIMLTA, addressed the gathering and provided a brief overview of AIMLTA, extending a **welcome & the keynote address:**

On the occasion of the 44th All India Conference and Scientific Seminar of the All India Medical Laboratory Technologists Association, I extend a warm welcome to all. I respectfully acknowledge the presence of our Chief Guest and inaugurator, Dr. G.N. Singh, former Director General, Drug Controller of India and former Secretary-cum-Scientific Officer at IPC, respected advisor of the Honorable Chief Minister of Uttar Pradesh, distinguished guest Major General Professor Vibha Dutta, Director-cum-CEO of AIIMS Gorakhpur, Dr. Pradeep Kumar Rao, the presiding Major General Dr. Atul Bajpai, former Vice-Chancellor of Mahayogi Gorakhnath University, Gorakhpur, distinguished guest Mayor of Gorakhpur Dr. Manglesh Srivastava, Dr. K. Ramchandra Reddy, Vice Chancellor of Mahayogi Guru Gorakhnath Ayurved University, Dr. Ram Kumar, Principal of BRD Medical College, Gorakhpur, Dr. Harishankar Joshi, Director of ICMR-RMRC Gorakhpur, National President Shri Manmohan Dass, along with all respected dignitaries, scientists from across the country, members of the scientific community, current and former office bearers, senior members, media representatives, organizing members, corporate partners, institutional staff, and all our dear colleagues from every corner of India.

Today, we have gathered here in Gorakhpur for an important conference and scientific seminar. On this occasion, I extend my heartfelt welcome to all of you. Our organization conducts conferences every year to provide a platform for knowledge sharing and innovation. We are confident that this conference in Gorakhpur will provide a new direction not only to Uttar Pradesh but to the entire country.

In today's sessions, with the blessings of our esteemed guests, we will discuss scientific research in fields such as hematology, pathology, biochemistry, microbiology, molecular biology, genetics, and related disciplines. These subjects are highly relevant today, and we hope to arrive at meaningful conclusions through in-depth discussions. I would like to especially thank our Chief Guest, Dr. G.N. Singh, for his efforts aligned with Honorable Prime Minister Shri Narendra Modi's vision of making India a global leader once again. Our organization has also begun contributing toward this mission.

In last year's AIIMS Delhi conference, our organization decided to form a Scientific Committee to develop scientific competence across the country. This committee will focus on: Exploring new research opportunities in India, Preserving India's scientific and cultural strengths Addressing issues like infertility and low immunity, Bringing global technologies to India, Presenting Indian research on international platforms

We also aim to form a highly skilled technocrat team to provide multidimensional online training to laboratory technology students. Additionally, workshops, seminars, and symposiums will be organized across country to ensure quality control (QC) and error-free reporting in laboratories. Accurate reports will make diagnosis easier, ensure uniformity, and can significantly reduce the national healthcare budget.

Through this platform, we also wish to present the condition and concerns of medical laboratory technologists to the government. Our organization is the apex body representing medical lab technologists and has been working at the national level since 1970. From the beginning, the organization has worked as a guiding force. In earlier decades, when there were very few institutes and untrained individuals were recruited, the organization took steps to improve academic standards by forming an Academic Board, recognized by the Government of India. Today, 200–250 institutes are affiliated under this Board. We also have a Foreign Collaboration Committee that assists technologists going abroad by providing NRI and Good Standing certificates, and by establishing international connections. Our Editorial Board publishes a scientific journal every three months, helping bring research to the national platform and guiding students through a dedicated student corner. We are proud to have received an ISSN number for this publication. Elections are conducted every three years for central committees under proper regulations. This program will sum up by this event.

Now, coming to the origin of laboratory technologists - the need arose due to public health demands. According to government records, after severe epidemics in 1948–49, five public health institutes were established. Based on the Bhore Committee report (1954), formal education for medical laboratory technicians began in 1957 with diploma courses. Initially, only two courses existed, which later expanded into the allied healthcare sector as we know today. The journey progressed with the introduction of bachelor's courses in PGI Chandigarh in 1967, followed by postgraduate courses. It began around “three-four” (early stages), and out of the 56 allied courses, the starting point goes back to 1957, when only two courses were introduced. Paramedical sciences—now known as Allied and Healthcare—began their journey in 1967, when a bachelor's course was started at PGI Chandigarh. Later, postgraduate courses were also introduced.

At the national level, to bring uniformity in courses and cadres, this association decided during its 8th conference (1980) that a Council for Medical Laboratory Technology should be formed. This was aimed at creating a regulatory body to standardize education across the country. Over time, continuous communication was maintained with both central and state governments, and the issue was raised on multiple platforms. Due to the visionary leadership of the Honorable Prime Minister of India, Shri Narendra Modi, a comprehensive national health policy was formulated in 2017. As a result, under the dedicated efforts of Shri J.P. Nadda, a bill was introduced in the Rajya Sabha in 2019, which eventually became the National Commission for Allied and Healthcare Professionals Act, 2021, implemented on March 28, 2021.

The commission is now actively functioning, and councils are also being formed at the state level, with the expectation that they will soon become fully operational. During a personal meeting, when representation was made for the first time, and also through submissions made at Nirman Bhavan, most issues were addressed. However, one small problem still remains. In the Act, the term “formal training” has been used. Because of this wording, laboratory technologists who have completed two-year, bachelor's, postgraduate, or PhD courses are facing issues with their ISCO code classification. This is because, without a bachelor's qualification, a two-digit ISCO code cannot be assigned, and due to the term “formal training,” the classification has been reduced to a three-digit ISCO code. I would like to draw attention to this issue.

It is a matter the National Commission launched its website on August 1 and invited suggestions from all stakeholders regarding curriculum development. The goal is to ensure uniform education across the country, instead of having different durations like one-year, two-year, three-year, or four-year courses. Our association also contributed significantly to this curriculum development. Based on our inputs, the promotion structure has been developed up to three levels, and this has been incorporated into the curriculum. For this, we thank the National Commission. Additionally, all laboratory technologists, central authorities, and state authorities made strong and sincere efforts by sending their messages through that app.

All India Medical Laboratory Technologists Association (AIMLTA), U.P. State organized the 44th All India Conference & Scientific Seminar at Mahayogi Gorakhnath University Gorakhpur (MGUG), Gorakhpur, Uttar Pradesh, India The event witnessed insightful guest lectures by experts on various topics, Scientific Paper presentation, Poster Presentation & Workshop. The program emphasized a multidisciplinary approach to Laboratory diagnosis and management, highlighting the importance, strengthening and effective sample processing. More than 1300 participants, including delegate members, students, and research scholars, attended the Conference.

Dr. Hari Shankar Joshi, Director of ICMR-RMCC, Gorakhpur

Organizing such a prestigious All India–level conference. It is truly commendable to see delegates from different parts of the country participating here. This is indeed a great achievement, You play a very crucial role in the healthcare system. You act as a vital link between the treating doctors and the patients. Many times, the course of

treatment depends on the results of investigations. While pathologists, microbiologists, and doctors are involved, the actual groundwork is carried out by you, continue to work with honesty, loyalty, and dedication, we can achieve great success in the medical field.

Dr. Ram Kumar, Principal, BRD Medical College, Gorakhpur

I sincerely congratulate all of them for their hard work in organizing this All India Medical Lab Technologists Association event here in Gorakhpur at Mahayogi University. It is clearly a successful event, as we can see such a large number of delegates present here. Any conference, regardless of the medical branch, serves as a platform where participants from across India and now even globally come together. Today, no conference remains merely local. Even local or state-level conferences and CMEs often become national or international due to the availability of advanced online technologies. We are able to connect, interact, and discuss extensively.

A conference is a place where experienced, skilled professionals interact with newcomers, students, and those entering practice. These interactions happen in many forms one-on-one and through various teaching and training methods which are highly beneficial.

In today's technological era, no field or expert can progress without using technology. In diagnostics and laboratory sciences, technology plays a crucial role. We are already witnessing tremendous advancements in imaging and radiology. Similarly, medical laboratory technology has also advanced significantly. Without technology, nothing is possible. Technology improves accuracy, increases speed, and enhances coordination and connectivity. This is essential because we live in a global era there is no longer anything that exists only in advanced Western countries and not here. Therefore, we must use technology properly and ensure that all our work maintains high quality.

One of the most important aspects for society, the state, and the country is data collection. Whatever work you do, proper and accurate data collection is extremely important. The data must be of high quality. There should be proper interpretation, discussion, and analysis of this data. Through new observations, innovation begins. Innovation is born from identifying new findings and developing new ideas.

Today's era demands that we become innovative. We must encourage our students and motivate them, providing the right facilities so that they do not work only for their livelihood but also contribute meaningfully to society. They should aim to develop new ideas, innovations, research, and even work towards creating patents, new technologies, and instruments.

On behalf of the local organizing team and Gorakhpur, I warmly welcome all of you. This is two-day conference participate actively, and in the evening, do take time to enjoy Gorakhpur, which has now become a wonderful tourist destination with many good places to visit.

Maj. Gen. Dr. Vibha Dutta, Director & CEO, AIIMS, Gorakhpur

It is a matter of great pride and joy for us that today, under the aegis of the All India Medical Laboratory Technologists Association, we have gathered on a scientific and intellectual platform. This platform is not only a medium for the expansion of knowledge but also gives a renewed identity to the role of medical laboratory professionals, who are considered the backbone of the healthcare system. As rightly mentioned earlier accurate diagnosis of any patient's illness, their treatment, and their recovery all are fundamentally dependent on laboratory technology. Therefore, the role of a lab technologist in restoring a patient's health is extremely crucial.

I would especially like to acknowledge that all lab professionals who are continuously dedicated to their work their honesty and hard work make an invaluable contribution to every patient's life. Hence, we must perform our duties with utmost dedication, integrity, and responsibility.

Medical laboratory sciences form the foundation of modern medicine. An accurate, evidence-based, and patient-centered healthcare system remains incomplete without reliable laboratory diagnostics. ***The global crisis like COVID-19 has proven that lab technologists are not just silent warriors, but frontline scientific fighters*.** The objective of this organization is not merely to function as an institution, but to become an integral part of a national mission towards building a developed India.

This includes promoting professional respect, skill enhancement, continuous education, research and innovation, as well as digital empowerment. This two-day scientific conference provides you an opportunity to strengthen the future of your profession by embracing new technologies such as artificial intelligence, automation, quality control, and global standards.

Our commitment should be: Quality in every report, Ethics in every process, And a spirit of nation-building in every service. The dream of a healthy India cannot be realized without empowered lab professionals. Let us all come together to make AIMLTA a globally recognized platform and contribute towards realizing the vision of Developed India-2047.

Dr. K. Ramchandran Reddy, Vice-Chancellor, Ayush University, Gorakhpur

This grand event has been made possible through the continuous efforts of the All India Medical Laboratory Technologists Association over the past four months. During this time, the association's representatives visited our university, coordinated with us, and we also extended our full support-whether in terms of accommodation or other arrangements-to ensure the success of this event.

During my research work at the Institute of Medical Sciences, Banaras Hindu University, *while working on a COVID project, I realized the true importance of blood investigations and pathological tests. At that time, there was a curfew-like situation, and patients were unable to move freely within the city. In such challenging circumstances, laboratory technologists showed extraordinary dedication. They went door-to-door to collect blood samples and conducted COVID profile investigations such as ferritin and others. This was an extremely risky task, as people were afraid even to come into contact with COVID patients. Yet, the laboratory personnel carried out their duties with remarkable courage and commitment.* Because of their dedicated efforts and coordination, our research was successfully published in an international journal.

As already mentioned by the distinguished speakers before me, laboratory investigations are essential for diagnosing any disease. Without proper diagnosis, treatment is not possible-whether in allopathy, Ayurveda, or any other traditional system of medicine. This conference is very timely and truly the need of the hour. Such national-level events help enhance awareness about the importance of laboratory investigations and their critical role in the healthcare system.

I sincerely appreciate the efforts of the All India Medical Laboratory Technologists Association and would also like to encourage them to extend their services beyond allopathic systems to Ayurveda and AYUSH hospitals as well.

Together, we can generate robust scientific data that will help validate traditional systems of medicine on a global platform and demonstrate their potential to benefit humanity.

In conclusion, I once again congratulate all the organizers for this wonderful event and express my confidence that such initiatives will contribute significantly toward building a “Developed India” and a “Developed Uttar Pradesh,” fulfilling the vision of our Honorable Prime Minister and Honorable Chief Minister Maha Yogi Adityanath ji and also the Honourable Prime Minister of India, Narendra Modi ji, their aims will be fulfilled with all your hand-to-hand work together.

I congratulate all of you for coming from distant places of different corners of India to join in this program at Gorakhpur city. And also, I apologize to the participants who accommodated in my university for their any inconvenience in the upcoming two days. I will rectify. I was out of station. Now I rectify all the facilities for your stay and I expect that your stay will be very peaceful and useful for the country. I could see the young generation also who are the coming future of India present over here. And again, I congratulate all the organizers for their continuous efforts in bringing such programs. I also salute all my seniors like G.N. Singh sir and Atul Vajpayee ji. And with all these things, I am very much thankful for the opportunity given to the Registrar of this university, Mr. Pradeep Kumar Rao ji.

Dr. G. N. Singh, Ex DG, Drug Controller of India & Adviser to hon'ble Chief Minister, Uttar Pradesh

In the sacred city of Gorakhpur, known for its rich heritage of education, culture, spirituality, and service, the 44th National Conference of All India Medical Laboratory Technologists Association is being organized at Mahayogi Gorakhnath University by the All India Medical Laboratory Technologists Association. On this auspicious occasion, I extend my heartfelt welcome and greetings to all of you. Mr. Devendra Prasad Ji, whose team selected Gorakhpur for this prestigious event, making us truly proud. A heartfelt welcome also to all the members of the Medical Laboratory Technologists Association who have come from different parts of the country. Today's pleasant atmosphere seems to enhance the dignity of this event as if nature itself is participating in this knowledge gathering. Recently, our Honorable Chief Minister, Yogi Adityanath Ji, emphasized that the journey towards making Uttar Pradesh and India great begins with health and education. Today, healthcare and education play a crucial role globally, and India is rapidly progressing in this direction.

Our collective goal is: “Sarve Bhavantu Sukhinah” (May all be happy) Modern science also reinforces this idea: “Prevention is better than cure.” And in this context, the role of medical laboratory technologists is extremely important. Because accurate diagnosis is the foundation of effective treatment and healthcare. Dear technologist colleagues, your work is not merely technical, it is directly connected to saving human lives. The future belongs to technology-driven healthcare, and you all are the pioneers of this transformation. We firmly believe that in the coming years, your role will become even more powerful and decisive, whether in scientific research or in enhancing the quality of healthcare services.

The coming era belongs to medical devices and diagnostics. As you may have heard, the Honorable Chief Minister has announced that the Jewar Airport in Uttar Pradesh will soon be inaugurated. Alongside it, we are establishing a Medical Devices Park spread over 350 acres. This is because technology is rapidly transforming, and India is moving towards self-reliance. Uttar Pradesh is set to play a leading role in this transformation. Nearly 200 manufacturing units related to medical devices technology and diagnostics are about to begin operations. They have already acquired land. In the coming time, immense opportunities will open up for our youth, our brothers and sisters, and the students who are currently studying.

Just as we are known as the “Pharmacy of the World,” we are now witnessing vast possibilities in diagnostics and medical technology as well. The vision of becoming a “Vishwaguru” (global leader), as envisioned by the Honorable Prime Minister and the Honorable Chief Minister, is closely tied to strengthening the social sector. The Chief Minister often emphasizes that a society becomes strong when its social sectors are strong. In Uttar Pradesh, his focus is especially on three key areas: health, education, and culture. India once led the world in healthcare, and we are once again moving in that direction.

We have full confidence that organizations like All India Medical Laboratory Technology Association play a crucial role. While the ideal vision is a healthy India where people do not fall ill, we must also recognize that in the present environment, both healthcare services and medical advancements have significant roles and opportunities. The world is now observing how India can lead in integrative medicine and provide a new direction. There is significant

global interest in India's traditional systems of medicine and biologics. Similarly, the potential in medical technology is now expanding rapidly.

We extend our congratulations once again to the All India Medical Laboratory Technologists Association for organizing such an excellent event. **The Honorable Chief Minister, Shri Yogi Adityanath Ji, holds great regard for technologists and would have addressed you personally, but due to the ongoing legislative session, he has sent his message. His message is as follows:**

He extends his heartfelt congratulations and best wishes to all participants and medical laboratory technologists from across the country. He emphasizes that medical laboratory technology plays a crucial role in healthcare. Through accurate testing, timely reporting, and scientific expertise, you not only empower doctors but also play a vital role in saving lives.

He also mentioned that during the COVID pandemic, your dedication, courage, and service strengthened the nation's confidence. The Uttar Pradesh government is continuously working to strengthen healthcare infrastructure, promote modern technologies, and enhance the skills of paramedical professionals. He expressed confidence that such events will further strengthen the healthcare system of the state and the country, bringing new energy, vision, and commitment to the sector.

We also request all distinguished participants, scientists, and students present here to consider organizing this conference again in Gorakhpur in 2032, during our centenary celebrations at Maharana Pratap Shiksha Parishad, which includes Deen Dayal Upadhyay University. We are planning year-long programs for this occasion.

We hope that the deliberations over these two days and the recommendations that emerge will be followed up with the association's leadership, and efforts will be made to ensure that at least three of your key proposals are implemented in Uttar Pradesh and across India. This will help fulfill your aspirations, career development goals, and professional expectations.

On behalf of our university, the people of Gorakhpur, and all the dignitaries present on this stage, we warmly welcome you. We also encourage you to explore Gorakhpur and share your suggestions on how you envision a developed Uttar Pradesh in the future. Your ideas are valuable, and we invite you to contribute to this vision.

Dr. Manglesh Srivastava, Mayor, Gorakhpur, Uttar Pradesh

Today is a moment of great pride and happiness for all of us as the National Convention of Technologists is being organized in Gorakhpur. We have just listened to the inspiring address of our Chief Guest, which has filled us all with new energy and direction. As a pathologist, I can confidently say that technologists are the backbone of our work. Without the support of DMLT and BMLT professionals, our work remains incomplete. Your contribution is truly invaluable. If we look at history, during the Spanish Flu of 1918–1920, the world witnessed massive loss of life. However, today, despite a much larger global population, we are better equipped to face such challenges, thanks to advancements in science, technology, and your dedicated efforts. For this, you all deserve heartfelt appreciation and congratulations.

There was a time, especially in the Purvanchal region, when we had to train technicians ourselves due to a lack of resources. But today, the situation is improving rapidly, and this transformation is a matter of pride for all of us.

The vision of our Hon'ble Chief Minister, “Development along with heritage” and the goal of a “Developed India by 2047” can only be achieved if we all perform our duties with honesty, dedication, and excellence. Just as our soldiers are fulfilling their responsibilities at the borders, we too must serve with the same commitment in our respective fields. This is the true path to nation-building.

In conclusion, I would like to urge all of you to continue striving for excellence and to contribute towards shaping a bright future for the coming generations. I sincerely thank all of you for organizing this event in Gorakhpur. And as the Mayor, if there are any shortcomings, please consider them mine and kindly forgive them.

Maj. Gen. Dr. Atul Bajpayee, Former, Vice-Chancellor, MGUG, Gorakhpur

So far, in the announcements of this conference, the points that have been highlighted may seem small, but their value is immense. I request all of you to incorporate these into your daily practice. Secondly, I would like to urge you that while you are always ready to save lives, after COVID it appears that personal protection has somewhat declined. This is my personal observation, I may be mistaken, but please try to maintain the same level of protection that we adopted during the COVID wave, especially for lab technicians, as their safety is extremely important. Pay attention to small things. For example, while taking blood samples, now mostly done by lab technicians, simple precautions like wearing protective gear (such as finger guards or rings used to prevent needle-stick injuries) can make a big difference. Use such measures to protect yourselves first, so that you remain safe.

Another request is to give importance to soft skills. By soft skills, I mean communication. After the doctor examines the patient and prescribes lab investigations, the next interaction often happens with you. Patients may ask whether something is right or wrong in their reports. Do not respond mechanically. We understand that you are under a lot of workload, but if you explain things politely and kindly, patients will feel more reassured. After the doctor, you are often the second point of communication, so recognize your role. The more compassionately you communicate, the better the patient's recovery. As many of our esteemed speakers have emphasized, honest reporting and honest work are the need of the hour. Earlier, treatment was largely based on clinical judgment, but now it seems that nearly 90% depends on your reports. Whatever you write is what the doctor relies on to modify or decide treatment. Therefore, your honesty in reporting is extremely important, please uphold it.

The fourth point is Artificial Intelligence. Since you deal with equipment and digital systems, it is essential for you to stay updated with developments in AI and laboratory technologies happening across the world. If you become proficient in this field, you too can contribute to transforming the world, just like Elon Musk. Some people fear that AI will take away jobs, but that is not the case. Jobs will actually increase, provided you become skilled in this domain.

Finally, I once again request all of you to attend every scientific session of this two-day program carefully and absorb the valuable insights shared. Try to implement the good practices in your lives.

Mr. Ranjit Kr. Gupta, Organizing Secretary, 44th AIC&SS

On the successful occasion of this prestigious National Conference and Scientific Symposium, AIMLTACON-2025, I, on behalf of the organizing committee, extend my heartfelt gratitude to all of you. First and foremost, we express our sincere thanks to our Honorable Chief Guest for gracing this event with their valuable presence and for sharing inspiring thoughts. Your guidance has provided new direction and energy to medical laboratory professionals. We also extend our deep appreciation to all our guest speakers and scientific experts, whose insightful lectures, presentations, and ideas have elevated AIMLTACON 2025 to a high-level academic platform. We are especially grateful to all the delegates and representatives from across the country and abroad. Your active participation, thoughtful questions, and meaningful discussions have truly enriched this conference.

I would also like to acknowledge and thank the Central Committee of AIMLTACON, including its President and Secretary, as well as all the subcommittees of AIMLTACON 2025—the Reception Committee, Decoration Committee, Registration Committee, Media Team, and all the volunteers. This event has been made successful through your tireless efforts, dedication, and teamwork.

In conclusion, I once again thank all the dignitaries present here and sincerely hope that this conference will prove to be a milestone in the development of medical laboratory professionals, improvement in quality standards, and strengthening of the nation's healthcare system

Scientific Seminar (Scientific Session) 2025 : 20th Dec., 2025

Venue : Auditorium, Mahayogi Gorakhnath University Gorakhpur (MGUG) Balalpar Road, Sonbarsha, Gorakhpur-273007, Uttar Pradesh

The Scientific Session commenced with a captivating guest lecture by **Dr. Binapani Gupta** on the topic: "**Assessment of Hemoglobin and Body Mass Index in Relation to Visuals Function Among School Children : A Cross-Sectional Observational Study."**

"This informative session was expertly chaired by Dr. Anil Kumar Maurya, alongside esteemed co-chair Dr. Rohit Kumar Srivastava."

"Following the guest lecture, the oral presentation session commenced, featuring delegates sharing their research and expertise."

Panel of Judges for evaluation of Scientific Paper presented by Medical Lab. Technologists of India, Both for Pre-Lunch and Post Lunch Session.

Dr. Binapani Gupta, Dr. Santosh Kumar Singh, Dr. Anil Kumar Maurya , Dr. Vinay Bhushan & Dr. Rohit Kumar Srivastava

Dr. Deepika Sood presented his paper titled "**Comparative study of phenolic compound, Lysol and methylene blue dye in bacterial inactivation."**

Dr K Ramakrishnan, (ICMR), Chennai, presented a compelling paper titled "**Assesment of Cord Morphology for Rapid presumptive Identification of Mycobacterium Tuberculosis."**

Dr. Ratandeep Sharma presented **"TB Mukt Bharat-Assessment through CBNAAT Indicators – Whether we are treading with the Proper Pace on the Appropriate Path?"**

In parallel of session a planned workshop from 11 AM to 01 PM on 'Automation in Biochemistry' was concurrently held in the Laboratory of Medical Faculty, MGUG, Gorakhpur on Day 1 of the conference."

The workshop empowered 24 participants with comprehensive knowledge and skills covering both conventional and automated techniques."

Following the conclusion, of the Day 1 workshop, certificates of participation were distributed to all attendees, commemorating their successful completion of the program."

The workshop convenor, Mr. Rocky Daniel & Dr. Anil Kumar Maurya acknowledged the dedication of the demonstrator and supporting staff, whose efforts made the workshop a resounding success."

Dr. Rajesh Rai, HOD, Pathology, BRD Medical College, Gorakhpur & Dr. Atul Rukadikar, HOD, Microbiology, AIIMS, encouraged the participants and organising committee members of 44th AIC&SS, MGUG, Gorakhpur (U.P.)

LUNCH Break

The Scientific session commenced with the presentation of **Dr. Bholanath Sarkar,** Kolkata, delivering an engaging talk titled **"Laboratory Diagnosis of the etiology of keratitis patients helps definitely the ophthalmologists for the management of the corneal disease: clinical and diagnostic study."**

Followed by TEA-BREAK, after tea break the oral presentation continued with:

Dr. Ratan Kumar Gosh from **PGIMER, Chandigarh** delivered an insightful talk on **" Impact of Vit-D supplements on Cardiac health in Renal Transplant Recipients".** His address explored the cutting-edge applications in laboratory medicine, offering valuable insights into its prospects and implications for India's healthcare landscape.

Cultural Program :

Cultural Events were well disciplined and organized following manner and decorum.

Rajnish Jha : Labridge- India's fastest growing & most trusted Diagnostic Platform Presentation (sponcer of kits and bags)

Rajnish Jha, is an entrepreneur with over a decade of experience across education, diagnostics, healthcare, and technology. In 2022, he had launched a B2B diagnostic platform focused on creating a connected, efficient, and standardized pathology ecosystem across India. Today, the platform supports thousands of partners through advanced testing, strong logistics, and technology-driven operations across multiple states. Mr. Rajnish Jha as he shared his vision on redefining diagnostics across India. He states:

The idea is simple: we want to become the backbone of the labs you are running. Whatever resources and strengths we have, we aim to provide them to you. With that vision and purpose, this initiative was started.

From our experience over the past few years, we've seen that many people are running labs, and you must have heard a lot about D2C (Direct-to-Consumer) brands in the last 5–6 years. What these D2C brands do is go directly to the patient. And when they do that, as sir rightly mentioned during the introduction, their packages can completely disrupt your entire business. But how can you compete with them? We have worked on solutions for that. So, Labridge operates only in the B2B segment—this is our very clear agenda. Whenever you start any business, it is very important to first define what you want to do and what you do not want to do.

In this regard, Labridge made a clear decision from the beginning: we will never enter the B2C space throughout our journey. We will never compete with your business. We will work only and only for you. Labridge was started with that very purpose.

The cultural programme, was a vibrant culmination of the day's events. The mesmerizing performance, featuring a diverse range of songs, dances, and music, captivated the audience and effortlessly dispelled the fatigue of the day." The day drew to a close with a sumptuous dinner, after which participants returned to their designated accommodations, graciously provided by the association."

LABTECHCON-2025

"AIMLTA, 44th AIC and SS",

Dated 20th to 21st December, 2025

VENUE : Auditorium, Mahayogi Gorakhnath University Gorakhpur (MGUG), Balapar Road, Sonbarsha, Gorakhpur 273007

Breakfast : Started at 8:00 A.M. on 21st Dec, 2025
